

REMARKS

The above amendments are made without prejudice.

The specification has been amended to insert headings and to reference the priority basis of the PCT application on which this application is based. Additional amendments were made to the specification to conform the application text to U. S. patent practice. No new matter is added, since all of the information was present in the original PCT application filing.

The claims have been amended to delete reference to multiple dependent claims, to render the claims in accordance with acceptable Markush claim practice and to correct minor grammatical inconsistencies. No substantive amendments have been made. No new matter is added.

The application, as amended, is now ready for examination.

Respectfully submitted,

Vangelis Economou
